2161

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/14/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/619,101	Applicant(s) IRVING ET AL.	
	Examiner Paul Kim	Art Unit 2161	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 August 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 2-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2161

DETAILED ACTION

1. This Office action is responsive to the following communication: Amendment filed on 2 August 2006.
2. Claims 2-21 are pending and present for examination. Claims 2 and 12 are independent.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 2-9 and 12-19** are rejected under 35 U.S.C. 103(a) as being unpatentable over Matthews et al (USPGPUB No. 2003/0050986, hereinafter referred to as MATTHEWS), filed on 13 September 2002, and published on 13 March 2003, in view of Sutcliffe et al (US Patent No. 6,249,282, hereinafter referred to as SUTCLIFFE), filed on 10 January 2000, and issued on 19 June 2001, and in further view of Hockey (USPGPUB No. 2004/0064515, hereinafter referred to as HOCKEY), filed on 29 August 2001, and published on 1 April 2004.
5. **As per independent claims 2 and 12**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

An apparatus for electronic collaboration in an environment including a plurality of communities, each of the plurality of communities having a plurality of live users and at least one community administrator, the apparatus comprising:

a community creation database that receives and stores preliminary profile data associated with a candidate user, the preliminary profile data indicating an interest of the candidate user in joining one of the plurality of communities {See MATTHEWS, Para. 0026, lines 6-8, wherein this reads over "SMC module is configured, for example. To create a user and user profile in database"; and Para. 0028, lines 1-2, wherein this reads over "[d]atabase 130 is configured to store member attributes and group attributes"};

Art Unit: 2161

a first filter that validates the preliminary profile data, whereupon the candidate user associated with validated preliminary profile data is deemed acceptable for participation in said one of the plurality of communities, the first filter tailored to said one of the plurality of communities, wherein the candidate user associated with the validated preliminary profile data thereby becomes a live user of the plurality of live users in said one of the plurality of communities {See MATTHEWS, Para. 0046, wherein this reads over "a private group can be joined by members of the community as approved The GA may, for example, restrict access to the group to a predefined list of users"; and Para. 0049, wherein this reads over "the SPC module, which compares the user's membership attributes to the group's permission criteria to verify whether or not the user has permission to join this group"};

wherein the live user creates at least one profile, wherein the profile includes descriptive information relating to the live user {See MATTHEW, Para. 0039, wherein this reads over "[t]he member's name or code may be associated in database 130 with additional member attributes"};

a search engine that searches for another of the plurality of live users in said one of the plurality of communities {See SUTCLIFFE, C7:L58-C8:L12, wherein this reads over "[a] first user can request a search of the database for other users based on characteristic and criteria data"} with which to communicate {See SUTCLIFFE, C4:L7-10, wherein this reads over "a user may choose a particular means to contact another user, such as by e-mail"}; and

a second filter that monitors communications between the plurality of live users within said one of the plurality of communities, the second filter including at least a flagging filter that flags communications between the plurality of live users according to predetermined criteria {See HOCKEY, Para. 0109, wherein this reads over "the thresholds and attributes used for distinguishing a flagged message may be user-configurable"}, wherein flagged communications are reviewed prior to release to their intended recipient {See HOCKEY, Para. 0115, wherein this reads over "other options include changing the message attributes so that it may not be delivered or opened other than by a system administrator, and/or may place the file in a 'quarantine zone'"}.

While MATTHEWS fails to expressly disclose a search engine, SUTCLIFFE provides a method for searching the database for other users based on characteristic and criteria data. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the above invention suggested by MATTHEWS by combining it with the invention disclosed by SUTCLIFFE. That is, the inclusion of the disclosed invention in SUTCLIFFE would provide for the searching of members of community according to the descriptive information related to each of the live users.

One of ordinary skill in the art would have been motivated to do this modification so that a live user may search for and find other live users according to the descriptive information.

Secondly, while MATTHEWS fails to expressly disclose a second filter that monitors communications between a plurality of live users, HOCKEY discloses a system wherein messages

Art Unit: 2161

may be flagged according to certain thresholds and attributes. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the above invention suggested by MATTHEWS by combining it with the invention disclosed by HOCKEY. That is, the modification of the invention disclosed in MATTHEWS by the invention disclosed by HOCKEY would allow for email message or other types of communications to be monitored for Spam and other inappropriateness.

One of ordinary skill in the art would have been motivated to do this modification so that message containing Spam and other inappropriateness may be filtered and intercepted such that said message are not delivered to their intended recipients.

6. **As per dependent claims 3 and 13**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

The apparatus of claim 1, wherein validation of the preliminary profile data includes an administrator of said one of the plurality of communities approving the candidate user {See MATTHEWS, Para. 0045, hereinafter referred to as "[t]he GA may also have authority to manage group membership, wherein members may be added to or deleted from a group membership list by the GA"}.

7. **As per dependent claims 4 and 14**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

The apparatus of claim 1, wherein validation of the preliminary profile data includes automatic validation based on one or more attributes of the preliminary profile data {See MATTHEWS, Para. 0044, wherein this reads over "such requests may be processed by an automated approval process"}.

8. **As per dependent claims 5 and 15**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

The apparatus of claim 4, wherein the one or more attributes include one or more of previous approval by an administrator of a specific other one of the plurality of communities and previous validation as a live user in said one of the plurality of communities {See MATTHEWS, Para. 0043, wherein this reads over "[r]equests may also be denied for persons who have in the past violated community rules"}.

9. **As per dependent claims 6 and 16**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

Art Unit: 2161

The apparatus of claim 1, wherein the preliminary profile data indicates an interest of the candidate user in joining at least one other of the plurality of communities {See MATTHEWS, Para. 0047, wherein this reads over "searches and/or filters may assist members in finding a group to join"}.

10. **As per dependent claims 7 and 17**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

The apparatus of claim 1, wherein the at least one profile includes one or more of:

a group profile that is accessible to the plurality of live users in said one of the plurality of communities {See MATTHEWS, Figure 4},

an individual profile that is not accessible to the plurality of live users in said one of the plurality of communities, and

a project profile that includes blind contact information regarding the live user.

It is noted that because the "an individual profile" and "a project profile" were optionally recited within the claim, they will not be give consideration for the remainder of this Office action nor will prior art be applied to said optionally recited elements..

11. **As per dependent claims 8 and 18**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

The apparatus of claim 1, wherein the search engine also searches for live users in communities other than said one of the plurality of communities {See SUTCLIFFE, C7:L58-C8:L12, wherein this reads over "[a] first user can request a search of the database for other users based on characteristic and criteria data"}.

12. **As per dependent claims 9 and 19**, MATTHEWS, in combination with SUTCLIFFE and HOCKEY, discloses:

The apparatus of claim 1, wherein the at least one profile of the live user includes one or more labels represent the descriptive information relating to the live user and wherein the search engine searches for another of the plurality of live users using labels associated with profiles of the plurality of live users {See SUTCLIFFE, C5:L22-67, wherein this reads over "characteristic and other data elements"}.

13. **Claim 10-11 and 20-21** are rejected under 35 U.S.C. 103(a) as being unpatentable over MATTHEWS, in view of SUTCLIFFE, in further view of HOCKEY, and in further view of Official Notice.

Art Unit: 2161

14. **As per dependent claims 10 and 20**, the Examiner takes Official Notice that it would have been widely known to one of ordinary skill in the art that profiles be created in a plurality of languages (e.g. English, Spanish, Chinese, French, German, and etc.) such that communities may span a plurality of international backgrounds.

15. **As per dependent claims 11 and 21**, the Examiner takes Official Notice that it would have been widely known and apparent to one of ordinary skill in the art to associate languages with a profile and implement a search according to the language characteristic of a plurality of live users.

Response to Arguments

16. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

17. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

18. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Kim whose telephone number is (571) 272-2737. The examiner can normally be reached on M-F, 9am - 5pm.

Art Unit: 2161

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Apu Mofiz can be reached on (571) 272-4080. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
